

## Using ICD10 Favorites

To begin assigning ICD10 Favorites, open up a Note and go to the DSM/ICD Diagnosis sub-section.

The subsection looks somewhat like this:

The screenshot shows the 'DSM / ICD Diagnosis' form. It has a header bar with a yellow star icon and the text 'Add To Favorites'. Below the header, there are three columns: 'DSM/ICD-9', 'ICD-10', and 'ICD Description'. There are two rows of input fields. Row 1 has empty fields for DSM/ICD-9, ICD-10, and ICD Description, followed by a 'Specifier' dropdown, a 'Status' dropdown, and an ellipsis icon with a red X. Row 2 has similar empty fields and controls.

If no codes are assigned, begin assigning those codes as needed:

The screenshot shows the 'DSM / ICD Diagnosis' form with the first row populated. The 'DSM/ICD-9' field contains '300.00', the 'ICD-10' field contains 'F41.9', and the 'ICD Description' field contains 'Anxiety disorder, unspecified'. The 'Specifier' and 'Status' dropdowns are still empty. The ellipsis icon with a red X is still present.

To add the code to your Favorites, click on any of the textboxes of the Diagnosis code you wish to add. So you can click either "DSM/ICD-9", "ICD-10", or "ICD Description" boxes.

Click the yellow star icon "Add to Favorites". If successful, you will get a message box, click OK.

To assign a Favorite, click the Ellipsis (to the left of the Red X icon). Your favorites will display here by default:

The screenshot shows the 'Diagnosis Lookup' dialog box. It has a 'Find...' field, a 'Search' button, and a dropdown menu labeled 'In this field...' with 'Description' selected. Below the search area is a table titled 'Favorites' with three columns: 'ICD9', 'ICD10', and 'Description'. The table contains one row with the values '300.00', 'F41.9', and 'Anxiety disorder, unspecified'. At the bottom of the dialog are 'Ok' and 'Cancel' buttons.
